

Modular Plug Presser

The only presser that works on every type modular plug, and guarantees connections to FCC specs, every time.

This ingenious tool is the most rugged, versatile and easy-to-use presser on the market. It makes mechanically sound, conductive connections in seconds with almost any modular plug available and lets you do it with one hand.

- ▶ This is the only tool, backed by a **LIFETIME WARRANTY**, that makes proper connections, guaranteed to FCC specifications every time
- ▶ GMP offers interchangeable dies that will meet any application including 10-contact RJ 45 plugs, AMP and DECconnect® (MMJ) plugs, and Category 5 applications
- ▶ The dies are interchangeable in seconds, without fumbling with screws and a screwdriver, components that can easily be misplaced or lost
- ▶ In the handles we've designed a stripper that measures and strips the correct length of jacket every time. In other words, no guess work and no rulers
- ▶ The handles can also be reversed making the tool just as user friendly for someone who is left-handed as it is for someone who is right-handed. No other tool offers this simple practical feature.

The presser's patented mechanical design multiplies your pressing efforts by more than 20 times. During use, a ratchet in the handle prevents premature release and a mechanical stop prevents overpressing. Interchangeable dies assure versatility, and snap in and out with a press of the thumb. A positive detent securely locks the die in place. We also offer a harness-quality leather presser holster with belt loop and spare die pouch to keep everything you need right at hand.

P/N	Description	Weight
70630	Presser w/holster and #4 & #6 dies	1 lb. 11 oz. (.765 kg)
70631	Presser w/holster and #8 die	1 lb. 9 oz. (.709 kg)
70632	Presser w/ holster and #B8 die	1 lb. 9 oz. (.709 kg)
70635	Presser w/holster and #6 & #8 dies	1 lb. 11 oz. (.765 kg)
