

C2 Cable Lasher - The Original Fiber Lasher

Our compact Model C2 Cable Lasher is perfect for lashing smaller diameter aerial cables to supporting strand with stainless steel lashing wire. The new design improvements make the C2 equally suited for new construction or overlashing up to its full 1-7/8 in. (46 mm) bundle capacity.

- ▶ Lashes single or bundled cables up to 1-7/8 in. (46 mm) onto strand sizes from 1/4 in. to 3/8 in. (6-10 mm) diameter.
- ▶ New style strand lock swings out of the way for unobstructed overlashing.
- ▶ Typical wire dimensions: 1200 ft. x .045 in. (365 m x 1.1 mm) or 1600 ft. x .038 in. (487 m x 1 mm)
- ▶ Lightweight and compact: Unloaded weight 35 lbs. (16 kgs.); only 10 in. O.D. x 18.5 in. long (25 x 47 cm). The C2's tapered housing eases passage through treed areas.
- ▶ The C2 Cable Lasher is furnished with a 6 ft. (1.6 m) bridle rope with snap hooks, an instruction manual and a rugged, lightweight storage chest.
- ▶ Like all GMP lashers, the C2 is built to last for many years of service. Components are CNC machined from alloy steel, stainless, bronze and aluminum castings to exacting tolerances and treated to withstand corrosion. Gear drives and sealed bearings assure maximum durability with minimal maintenance.

A: The C2 Lasher is designed with a re-movable front handle (standard) when overlashing. When removed, a generous 2-1/16 in. (52 mm) opening allows for smooth overlashing to an existing bundle.

B: An optional overlap handle (P/N 28120) is available which can be placed on the front of the machine without any interference of the opening when overlashing.
