

P/N 75531 Also available is a special version with CGA 580 right hand male inlet fitting.

## C High Pressure Gas Regulator

Helps control gas pressure when using pneumatic tools like a cutter or presser.

- ▶ Regulator has two gauges that can handle pressures from 0-180 psi, with maximum flow of 1500 cu. ft./hr. (42.5 cu. m/hr.)
- ▶ It's a single-stage commercial regulator specially modified to include a high-pressure gauge and fitting for connection to a standard 224 or 24 cu. ft. nitrogen cylinder
- ▶ The regulator has a single reducing valve and safety valve, controlled by an adjusting screw and two gauges
- ▶ The high pressure gauge monitors pressure in the cylinder, while the low pressure gauge is for the regulator outlet

P/N 75530 Inlet fitting is CGA 555 left hand female. Weight: 5 lbs. 10 oz. (2.6 kg)

Right hand inlet (male)  
CGA 580

Left hand inlet (female)  
CGA 555

Converts female inlet to male inlet

P/N 70119 Female/male adaptor is available for field retrofit of the 8221 or the 7553 series regulators.
