

**New
or
Improved**

Whether you're working in a bucket or on the ground, GMP sunshades give you fast shelter from the sun. GMP offers a choice of rugged umbrellas and a complete line of accessories that provide maximum mounting and angle-adjustment flexibility.

D Umbrella & Dielectric Umbrella

Choose between our Model D Umbrella for standard use or our Dielectric Umbrella to reduce the potential of electrical shock when working near power wires. To make your umbrella even more useful, our optional Umbrella Angle Adapter (71572) provides five tilt-angle adjustment settings for maximum protection no matter where the sun is located. This adapter can be offered with a One-Piece 24 in. (609.6 mm) Pole Extension (71647) or with a Two-Piece Pole Extension set (71640), giving you a full 45 inches (1.125 M) of pole length.

For protection while working at ground level, we offer a sturdy Tripod Umbrella Kit (71649) that features weighted-leg construction. The kit comes complete with a durable storage bag.

For weather protection while working aloft, a convenient Bucket Holder (28210) pole attachment is available for securely mounting your umbrella to any flat bucket surface (requires 71647 Angle Adapter with one-piece pole extension). Bucket Holder thumb screws make precise umbrella positioning a snap. All accessories accommodate GMP manufactured umbrellas.

P/N 71649 Tripod Kit with P/N 70098 Model D Umbrella

Optional P/N 28210 Bucket Holder

- ▶ A tough plastic 68 in. (173 cm) dia. umbrella cover is colored safety yellow on the top (custom company logos available)
- ▶ A reflective white underside cuts down on interior heat absorption and is vinyl-coated; nylon rib-end pockets keep the frame from tearing the cover
- ▶ Self-sealing waterproofed, waxed stitching and improved construction, using a nylon sleeve and rib retainers for attaching the frame's six collapsible ribs
- ▶ The frame's collapsible fiberglass ribs connect at a ring-type lock that slides along the pole as you open or close the umbrella
- ▶ To lock the ring, just slide it over the set pin in the pole, and rotate it
- ▶ The 43 in. (109 cm) long wooden pole has a male ferrule so you can attach the 29 in. (74 cm) extension section for a height of 6 ft. (1.83 m)

P/N 71649 Tripod Kit includes this sturdy carrying bag

Optional 71572
Angle Adapter

71647 Angle Adapter & 1 PC Pole Ext.
Combination

80924 Lower Pole Assembly
with Spike End

- ▶ When working near power wires choose the dielectric umbrella to reduce potential sources of electrical shock (see O.S.H.A. below)
- ▶ Angle Adapter (71572) has five settings to allow either style of umbrella to be tilted as the sun moves.
- ▶ One-piece angle adapter (71647) accepts upper pole of the GMP umbrella. This adapter is required to mount GMP umbrellas to the GMP Bucket Holder.
- ▶ The Tripod Kit (71649) accepts upper pole of umbrella. Kit includes weighted-leg construction, angle adapter and telescoping stand.

DANGER:

The D Umbrella can conduct electricity. Look out for power wires in your work space and keep this product well away from potential sources of electric shock. These accessories are not recommended for use with the Dielectric umbrella (70352).

O.S.H.A. Safety-related Work Practices

1910.335 Safeguards for personnel protection

(2) General protective equipment and tools.

- (i) *When working near exposed energized conductors or circuit parts, each employee shall use insulated tools or handling equipment if the tools or handling equipment might make contact with such conductors or parts. If the insulating capability of insulated tools or handling equipment is subject to damage, the insulating material shall be protected.*

P/N	Description	Weight
28210	Holder Bucket for Umbrella Accommodates 1 PC Pole Ext. P/N 71647 (hardware not included)	1.75 lbs. (.79 kg)
