

Mini Block

This versatile, economical block supports any cable up to 1-1/4 in. (32 mm) in diameter including coaxial, so you can use it in CATV cabling.

- ▶ There's a lifting ring for easy strand placement, a molded rubber roller for smooth motion, and a steel sleeve and shaft for durability
- ▶ The hot rolled steel frame is powder-coated for extra visibility and corrosion resistance

P/N 01315 Weight: 2 lbs. (.91 kg)

Cable Block with Aluminum Roller

This economical block has an aluminum roller and is used for new strand and overlash work.

- ▶ Can accommodate up to a 2 in. (51 mm) cable
- ▶ The strand wedges in the "V" notch of the sturdy cast aluminum frame
- ▶ The spring-loaded strand retaining pin will clear two previously lashed 3/4 in. (19 mm) cables for overlashing
- ▶ A rotating gate keeps line or cable on the roller

P/N 10700 Weight 2 lbs. (.91 kg)

Cable Block with Rubber Roller

This economical block has a rubber roller and is used for new strand and overlash work.

- ▶ Can accommodate up to a 2 in. (51 cm) cable
- ▶ The strand wedges in the "V" notch of the sturdy cast aluminum frame
- ▶ The spring-loaded strand retaining pin will clear two previously lashed 3/4 in. (19 mm) cables for overlashing
- ▶ A rotating gate keeps line or cable on the roller

P/N 10701 Weight 2 lbs. (.91 kg)
