FOR IMMEDIATE RELEASE: New Product Introduction

GMP INTRODUCES HEAVY DUTY STIFF SPINE CONDUIT CLEANERS WITH ENGINEERED BRISTLES THAT CLEAR AND CLEAN GRIMY UTILITY CONDUITS

January 2010; Trevoese, PA – General Machine Products Company, Inc. (GMP), Trevoese, PA, is pleased to introduce Heavy Duty Stiff Spine Conduit Cleaners to its complete line of underground cable placement tools and equipment. GMP's Conduit Cleaners are the perfect tool for removing the toughest obstructions easily, like dirt, ash, sand, oxides, and debris, from utility conduits. These Conduit Cleaners are constructed with hundreds of resilient, oil-tempered spring steel bristles that can handle any cleaning job without damaging the conduit's surface.

GMP's Conduit Cleaners are offered in sizes that range from 2 to 6 inches in diameter (50 to 153 mm) and 4 to 5.25 inches in length (102 to 134 mm), making them useful in a variety of utility conduit cleaning applications. Their durable construction provides a work load capacity of up to 1,250 lbs. (567 kg). The Conduit Cleaners come with pulling eyes conveniently located on either end for pulling line attachment. This makes cleaning fast and easy in either direction. The Conduit Cleaners are designed to stand up to years of rugged use. They are uniquely engineered with looped bristles through the central mounting plate, rather than just affixed as with ordinary brush cleaners. The Conduit Cleaners are designed to be used in almost any type of utility conduit, including lead, iron and other metals. For fiberglass or plastic utility conduit applications, use GMP's less abrasive Stiff Spine Conduit Brushes.

The durability and wide range of sizes has made the GMP Heavy Duty Stiff Spine Conduit Cleaners extremely popular with utility line personnel. More information about this product is available online at gmptools.com/nf/10152.htm or by contacting Ted Clemens at 215-357-5500; info@GMPtools.com.

ABOUT GENERAL MACHINE PRODUCTS COMPANY

For more than 75 years, General Machine Products Company is a global provider of a wide range of products for the telecommunications, power utility and cable television industries, and the contractors who serve them. Product applications include the placement of fiber optic, copper conductor, and coaxial cable both aerially and underground.

GMP aerial cable lashing machines, Adams® continuous duty winches and fiber optic cable pullers are accepted as the industry standard. The complete line of GMP's 1,100+ products also includes cable reels and aerial blocks, cable cutters, unique RJ plug pressing tools, fiber optic cable blowing equipment, and other specially-designed tools for the data, telecommunications, and power utility markets.

Our facilities include a 100,000-square-foot manufacturing plant in Trevoze, PA, in suburban Philadelphia, and in Rutland, England (its CBS Products, Ltd. unit). Both facilities are equipped with a full complement of technologically advanced machine tools manned by a well-trained team of craftspeople.
