FOR IMMEDIATE RELEASE:

The Compact and Portable Whisper Cable Blower Makes Interior or Exterior Micro Fiber Optic Cable Installation Quick and Easy

Trevoze, PA – General Machine Products Co., Inc. (GMP), Trevoze, PA, is pleased to introduce the Whisper Micro Cable Blower to its complete line of fiber optic cable placing equipment. Engineered to install micro fiber cable into pre-installed 4.0 to 18.0 mm (0.157 to 0.708 inch) diameter microduct, the Whisper Micro Cable Blower (Whisper) will place 2 to 8.5 mm (0.078 to 0.334 inch) diameter cable at speeds up to 80 M (260 feet) per minute. This, along with its low maintenance and high durability makes the Whisper an excellent value.

Ideal for smaller jobs where traditional, field-size blowing machines are unsuitable, the Whisper's versatility, compact size and portable maneuverability make it perfectly suited for both interior and exterior fiber cable placement applications.

The operating principle behind the Whisper is simple and convenient. Microfiber is propelled into the microduct by the use of a conventional, variable speed drill (not included). The unit is also engineered to provide fast, on-site adjustments to accommodate multiple cable or duct sizes.

Other Features Include:

- Flat drop compatibility (call for details)
- Electronic monitoring system provides digital read-outs of speed and distance
- Lightweight, precision machined, and durable construction
- Integral air valve and pressure gauge
- Can be operated by a single person
- Backed by GMP's 75-years of engineering integrity and defect-free products and services

More information about the Whisper Micro Cable Blower is available online at:
www.gmptools.com/nf/89910.htm, by calling 215-357-5500, or by email sales@GMPtools.com.

About General Machine Products Company

For more than 75 years, the General Machine Products Company is recognized as a premier global supplier of a wide range of products for the telecommunications, power utility and cable television industries, and the contractors who serve them. Product applications include the placement of fiber optic, copper conductor, and coaxial cable both aerially and underground.

GMP aerial cable lashing machines, Adams® continuous duty winches and fiber optic cable pullers are accepted as the industry standard. The complete line of GMP's 1,100+ products also includes cable reels and aerial blocks, cable cutters, unique RJ plug pressing tools, fiber optic cable blowing equipment, and other specially-designed tools for the data, telecommunications, and power utility markets.

Our facilities include a 100,000-square-foot manufacturing plant located in Trevoise, PA, in suburban Philadelphia, and in Rutland, England (its CBS Products, Ltd. unit). Both facilities are equipped with a full complement of technologically advanced machine tools manned by a well-trained team of craftspeople.
